EXPERIENCE

BOOKCLICK | CONTRACTOR

December 2023 – May 2024

- I spearheaded the development of the MVP for BookClick, taking a hands-on approach to its creation and implementation.
- Recruited and managed a 2-member development team, fostering a collaborative and productive environment.
- Implemented Agile methodologies to streamline project execution and ensure alignment with business objectives.
- Optimized application performance through thorough code reviews, refactoring, and performance tuning.

PREPLY | SOFTWARE DEVELOPMENT TUTOR

April 2023 – September 2023

- Provided personalized software development tutoring sessions on Preply, tailored to meet individual student needs and learning objectives.
- Delivered comprehensive guidance and mentorship in programming languages, algorithms, and software design principles.
- Empowered students to enhance their coding skills and problem-solving abilities through interactive and engaging lessons.

PENGQUIN | FRONTEND DEVELOPER

June 2022 – August 2022

- Developed reusable components to improve the efficiency of the development process.
- Contributed to the development of new features and functionalities in Penguin's web application.
- Helped develop and integrate Penguin's UI library.
- Conducted code reviews, identified and resolved bugs, and refactored code to reduce technical debt.
- Provided design solutions to the team for a more user-friendly interface.

FREELANCER | FULL-STACK WEB DEVELOPER

December 2021 – June 2022

- Successfully completed multiple e-commerce/CMS website projects.
- Communicated with clients to understand their requirements and provided regular updates on project progress.
- Delivered high-quality work to clients with a high satisfaction rate.
